### **ROAD SIGNS APPROVED IN CEDAR GLEN REDEVELOPMENT AREA**

The County Board of Supervisors approved at today's hearing Community Development Block Grant (CDBG) funding for a project that will install 99 street signs in the community of Cedar Glen, which was affected by the devastating Old Fire in October 2003.

Currently, the streets in the community are not marked, making it extremely difficult for emergency service vehicles and other service related vehicles to respond to specific locations. "The installation of these street signs will improve the response times for emergency service calls," said Supervisor Dennis Hansberger, Third District Supervisor, who represents the Cedar Glen community. Response times currently can take up to 20-30 minutes upon arrival in the community. As a result of this project, response times will be cut by more than 50 percent. This project will also address conditions of slums and blight that exist as a result of the fire.
